Christian Nold is an artist, designer and educator working to develop new participatory models for communal representation. In 2001 he wrote the well received book 'Mobile Vulgus', which examined the history of the political crowd and which set the tone for his research into participatory mapping. Since graduating from the Royal College of Art in 2004, Christian has led a number of large scale participatory projects and worked with interdisciplinary teams on diverse academic research projects. In particular his 'Bio Mapping' project has received large amounts of international publicity and been staged in 16 different countries and over 1500 people have taken part in consultations, workshops and exhibitions. These participatory projects have a strong pedagogical basis and grew out of Christian's formal university teaching. He is currently based at the Bartlett, University College London.

2004 MA Interaction Design, Royal College of Art (*Distinction*)

1999 BA Fine Art Intermedia, Kingston University (*First Class*)

1996 BTEC Art and Design, Brighton College
